

# WELCOME to a one day training event on **POISON AND PESTICIDES**

**Presented by Andre Botha**

Bird of Prey Manager, Endangered Wildlife Trust  
Co-chair, IUCN Vulture Species Specialist Group

**Supported by Liz Komen**

NARREC Namibia Animal Rehabilitation Research and Education Center  
and the Ministry of Environment and Tourism

Throughout the world the environmental damage that has been and can be done by poisonous chemicals is being addressed through training events. The field of poisons and pesticides is very broad as chemicals are available and used in almost every sphere of life. Namibia has a history of poisonings through both ignorant and criminal intent. These events have been fatal for people and for wildlife. Today numerous species are classified as endangered and chemical poisonings are very often cited as a prominent reason.

## **Agrochemicals**

\*Use Mode of Action Composition Formulation \*Toxicity \*Primary and Secondary Poisonings  
\*Registration Labels \*Pesticides: Buying Transporting Storing, Mixing Applying  
\*Spills Cleaning-up \*People Containers \*Poisoning symptoms of \*Basic first Aid

## **Legislation and Regulations**

\*National Regional International \*Advocacy Cooperation:

## **Wildlife Species**

\*Extinct to Least Concern \*Species affected \*Vultures \*Wildlife First Aid

## **The Poison Scene**

\*Competent Investigation \*Equipment \*Recording \*Incident Reports

## **Sampling**

\*Identification \*Collecting Samples and Specimens \*Basic anatomy and physiology

## **Safety and Decontamination**

\*Human safety \*De-contamination of the scene
