

# WE NEED YOUR HELP

The NCE's **Near-Endemic Plants Project** is preparing information sheets about Namibia's near-endemic plants. These sheets will be available online through the Namibian Environmental Information Service - EIS (<http://www.the-eis.com/atlas/?q=plant-information-system>).

**We need your help** in getting photos of near-endemic plants – a list of which you can find on the EIS's Plant Information System by filtering for "near-endemic". The JRS Biodiversity Foundation has made available prize money for the persons that submit the most records and photos of near-endemic plants to the EIS's Indigenous Plant Atlas.

**1<sup>st</sup> prize = N\$3000    2<sup>nd</sup> prize = N\$2000    3<sup>rd</sup> prize = N\$1000**

**5 consolation prizes of N\$425 each**

## Rules:

Competition closes on **31 August 2024**

Records and photos must be submitted to the **Indigenous Plant Atlas** on the EIS

Only records of near-endemic species will be counted

A species will be counted only once per quarter-degree square per atlaser

At least 50% of near-endemic plant records submitted, must have a useable photo attached

The atlaser must agree to the photo being used on the information sheet that will be put online (with due acknowledgement)
